Projects:

Title	:	Daily Wage Worker Management System
Technology	:	Python, Django, MySQL
Details	:	The project "Daily wage worker management system" aims to keep daily based records of wage workers working in various departments. This system maintains the information about number of workers entering and exiting the plant and the particular department and their entry and exit time collected from the security and supervisors. The reports generated from the data stored by security and supervisors will be available to the

plant head, so the frauds/cheats at the supervisors/manager level can be detected easily.

Team size : 4

Title : Online Multiplex Ticket Booking System

Technology : PHP, MySQL, Bootstrap, JavaScript

Details : A web-based project. Similar to bookmyshow website with some additional innovative features.

Facility to store the information of the new customer, different types of movie show timing, ticket rates of different types on show class etc.

Ability to the admin to manage movies, apply or remove social distancing to multiplexes, apply coupon codes to users

Team size : 5
